McClave School Community,

In November, the McClave School Board and Administration asked our school community for their input on facility planning considerations with the use of a survey and received 99 responses. We would like to thank all of those that took the time to complete the survey and provide additional comments. The administration and school board value your feedback and we will continue to seek it throughout this process. A summary of the survey results can be found on the following page.

The school board and administration plan to continue discussions concerning school facilities with the goal of developing a long-term facility master plan. This process is expected to take some time as we consider our options and we don't anticipate any major renovations or construction to begin until extensive planning has occurred. We will continue to explore options that will lessen costs, including researching BEST Grant funding and timelines. We also plan to solicit expertise from companies that specialize in school planning and renovation/construction to better understand our options. Our school is the anchor of our community and we hope to lay the groundwork to continue that tradition for generations to come.

Sincerely,

The McClave School Board and Administration
